The Clinical Orthopaedic Society is delighted to be hosting its 101st Annual Meeting September 19-21, 2013. This is going to be a great meeting as our organization moves into its second century. September is a perfect time to visit Buffalo and nearby Niagara Falls. Our program chairmen, Drs. Phillips and Anders along with our local host, Dr. Slough, have put together an exceptional educational and social program. We are fortunate to have Drs. Tony Herring, Felix "Buddy" Savoie and Ben Kibler as our three presidential guest speakers. Dr. William Hamilton will be the recipient of the Dr. and Mrs. J. Elmer Nix Ethics Award.

Be sure not to miss their presentations and the rest of our excellent academic program.

This year's meeting is being held along with the New York State Society of Orthopaedic Surgeons and will be a great time for fellowship with your colleagues from New York.

Join us for the President's Reception at the Pierce Arrow Museum on Thursday, September 19. The Pierce Arrow Motor Company produced some of the finest automobiles made, and for over 20 years, supplied cars to the White House for the use by the President. Come see this world class collection of cars, motorcycles, bicycles and memorabilia. The Friday night reception will be held at Templeton Landing.

Please encourage your partners and other orthopaedic colleagues to attend our 101st Annual Meeting. Let us continue to grow and strengthen our society into the second century of its existence. Mark your calendar and plan to attend our annual meeting. We look forward to seeing you in Buffalo.

MEETING MISSION STATEMENT

The 2013 101st Annual Meeting of the Clinical Orthopaedic Society will offer participants a comprehensive review of orthopaedic conditions including sports medicine and arthroscopy, patient safety, trauma, foot and ankle, pediatric orthopedics, and upper extremity surgery. Meeting attendees will review tried and true methods of diagnosis and treatments in addition to acquiring knowledge in the latest diagnostic and treatment techniques in each of these areas. The COS program faculty for 2013 are experts in the orthopedic subspecialty topics represented and will be available to clinicians throughout the meeting. Dialogue and interaction between the audience and presenters will be highly encouraged.

Highlighting this year's program are Live Patient Presentations that will allow participants to view patient-physician interactions. This program is sponsored by the Clinical Orthopaedic Society for members and non-members, and has been designed to meet the needs of practicing orthopaedic surgeons.

TARGET AUDIENCE

Orthopaedic surgeons, orthopaedic residents, sports medicine physicians, physician assistants, nurse practitioners, nurses, physician therapists, occupational therapists, trainers and other allied health personnel, epidemiologists, researchers, and all those involved with the care of patients with orthopaedic conditions will benefit from attending the 2013 101st Annual Meeting of the Clinical Orthopaedic Society.

ACCREDITATION

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the American Academy of Orthopaedic Surgeons and the Clinical Orthopaedic Society. The American Academy of Orthopaedic Surgeons is accredited by the ACCME to provide continuing medical education for physicians.

The American Academy of Orthopaedic Surgeons designates this live activity for a maximum of **17.25 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Clinical Orthopaedic Society is recognized by the Board of Certification, Inc. to offer continuing education for Certified Athletic Trainers. This program has been approved for a maximum of **17.25 Category A hours of continuing education**. Certified Athletic Trainers should claim only those hours actually spent participating in the continuing education activity.

COURSE OBJECTIVES

Spine

Outline the most recent techniques and treatment options in pediatric and adult spine. Understand the most common treatments for spine trauma and spine conditions.

Pediatrics

Define the most up-to-date trends in the evaluation and treatment of SCFE, Legg-Perthes disease, adolescent clavicle fractures, and pediatric hip disorders.

Tumor

Describe current management of common tumors seen by orthopaedic surgeons. Enhance recognition and appropriate referral of tumors. Identify the types of treatments available.

Trauma

Assess the most recent treatment of common orthopedic trauma cases. Understand how to optimize treatment of fractures in the elderly and the advantage of an integrated care model in geriatric fracture cases. Clavicle fractures and the role of scapular positioning and control will be discussed.

Arthroplasty

Understand how to deal with complex arthroplasty conditions of the hip, knee and shoulder including minimally invasive options and how to stay out of trouble. Learn about alternate bearings in total hip arthroplasty and modular femoral stem options and shoulder arthroplasty options including Reverse Total Shoulder Arthroplasty.

Sports and Arthroscopy

Identify causes of hip and groin pain along with lower abdominal pain. Learn current arthroscopic and open treatment of common hip conditions and hip dysplasia. Review current updates to treatment of meniscal injuries. Learn how to evaluate and treat common throwing injuries. Understand the role of the scapula in shoulder problems. Discuss techniques to improve rotator cuff surgery. Understand indications and enhanced techniques for elbow arthroscopy.

Foot and Ankle

Learn how to deal with complex foot conditions such as ankle arthropathy and difficult pilon fractures. Understand how to evaluate and treat ankle arthritis and posterior tibial dysfunction.

Hand and Wrist

How to evaluate and treat hand and wrist conditions and understand current treatment options and practice guidelines. Discuss concepts of treatment of distal radius fractures.

Patient Safety

Assess patient safety process issues and system failures including ways to improve outcomes in orthopedics and geriatric fracture management.
